

- A positive is a positive regardless of masking requirements or vaccinations status
 - Isolate for 5 days from either start of symptoms or date of positive test (if symptom onset is unknown or asymptomatic). Day 0 is either date of symptom onset or positive test date, Day 1 is the following day.
 - Return to school day 6 if asymptomatic or if symptoms are improving and wear a mask "at all times, unless eating or drinking at lunch" for days 6-10. If can't mask properly, isolate at home for the full 10 days and return day 11.
 - Symptoms must be improving, and student must be fever free for 24 hrs without the use of fever reducing medications.
 - "At all times" includes outdoors if around other people.
 - May return to extracurricular activities on Day 6 **IF** able to properly mask at all times for day 6-10, above conditions are met, and cleared by a physician.

• If a mask requirement is in place (must be fully enforced and monitored to be considered a mask mandate)

- If a student is exposed IN THE CLASSROOM (school day starts from pick up on bus or drop off at school by a parent until the child is dropped off from the bus after school or a parent picks them up) as long as they remain asymptomatic, they may remain in school, but must continue to wear a mask properly at all times for 10 days. They may continue extracurricular activities (wear a mask when not actively performing/playing during sporting activity) for all 10 days. If symptoms develop, get a test and stay home. If positive, follow isolation guidelines. If test is negative, return to school when symptoms have resolved.
- If exposed OUTSIDE THE CLASSROOM (including home contacts)
 - If fully vaccinated (12-17) and up to date (18 and older) may remain in school as long as asymptomatic and can wear a mask properly at all times. They may continue extracurricular activities; wear a mask for 10 days. Unmask only while actively playing or performing. If symptoms develop, get a test and stay home. If positive, follow isolation guidelines. If negative, return to school when symptoms have resolved.
 - If unvaccinated/partially vaccinated (12-17) or not up to date (18 and older) stay home for 5 days. Return to class on day 6 if still asymptomatic. Continue to wear a mask for days 6-10. No extracurricular activities for 5 days of home quarantine. May resume day 6 ONLY if able to wear a mask at all times (including while actively performing or playing during your sporting activity) for days 6-10. If you cannot safely mask, do not participate in the extracurricular activity. If symptoms develop, get a test and stay home. If positive, follow isolation guidelines. If test is negative, return to school when symptoms have resolved.

• If a mask requirement is not in place or is not fully enforced and monitored

- If a student is exposed in or outside the classroom, including home contacts:
 - If fully vaccinated (12-17) and up to date (18 and older) may remain in school as long as asymptomatic and can wear a mask properly at all times. They may continue extracurricular activities; wear a mask for 10 days. Unmask only while actively playing or performing. If symptoms develop, get a test and stay home. If positive, follow isolation guidelines. If negative, return to school when symptoms have resolved.
 - If unvaccinated/partially vaccinated (12-17) or not up to date (18 and older) stay home for 5 days. Return to class on day 6 if still asymptomatic. Continue to wear a mask for days 6-10. No extracurricular activities for 5 days of home quarantine. May resume day 6 ONLY if able to wear a mask at all times (including while actively performing or playing during your sporting activity) for days 6-10. If you cannot safely mask, do not participate in the extracurricular activity. If symptoms develop, get a test and stay home. If positive,

follow isolation guidelines. If test is negative, return to school when symptoms have resolved.
